Financial Economics graduate with expertise in financial analysis, data mining, and fintech fundamentals, including open banking, AI. Skilled in deriving insights and analytical reporting for impactful decision-making.

## EXPERIENCE

### Academic Projects

- Financial Analysis Project

Completed a financial analysis project in three stages: (1) Business Strategy Analysis to understand market position, (2) Financial Ratio Analysis to evaluate financial performance, and (3) Prospect Analysis for forecasting and valuation. This project strengthened my skills in financial analysis and modeling.

- Data Mining and Analysis in Money and Banking

Conducted a data mining project focused on money and banking, where I gathered and analyzed data to create a detailed report. This experience improved my skills in data handling, analysis, and report writing in the financial field.

### Future Fintech Disruptors Academy Training Program

Jordan Payments & Clearing Company (JOPACC)

Completed the Future Fintech Disruptors Academy Training Program, gaining a solid foundation in fintech fundamentals, business and software development, APIs, the Open Banking ecosystem, AI, and machine learning.

Participated in an inter-university competition with a team from the Hashemite University to introduce a new service to the CliQ system, focusing on workflow design, frontend and backend development, and innovative solutions. This experience strengthened my skills in critical thinking, teamwork, and problem-solving.
